

PUMPKIN ELEPHANT TOOTHPASTE

MATERIALS:

- HOLLOWED OUT PUMPKIN
- 1 CUP (4 OZ) 6% HYDROGEN PEROXIDE. I USED A 20 VOLUME CLEAR DEVELOPER (LIQUID) THAT I PURCHASED FROM SALLY'S BEAUTY SUPPLY.
- FOOD COLORING
- 6 TABLESPOONS OF WARM WATER
- 2 PACKETS OF ACTIVE YEAST
- 2 TABLESPOONS OF DISH SOAP
- RECYCLED PLASTIC WATER BOTTLE, JAR, BEAKER, ETC.
- FUNNEL
- TRAY
- MEASURING CUPS AND SPOONS
- SAFETY GOGGLES

HOW IT WORKS:

HOW TO MAKE YOUR PUMPKIN ERUPT

IN YOUR EMPTY PUMPKIN PLACE YOUR EMPTY BOTTLE, JAR, BEAKER, ETC. I ACTUALLY USED A 2 CUP MEASURING CUP IN OUR PUMPKIN, WHICH WORKED PERFECTLY.

POUR IN THE HYDROGEN PEROXIDE. ADD THE DISH SOAP AND SEVERAL DROPS OF THE FOOD COLORING OF YOUR CHOICE. POUR THE YEAST IN AN EMPTY BOWL AND ADD THE WARM WATER; STIR WITH A FORK FOR ABOUT 1 MINUTE OR UNTIL THE YEAST HAS DISSOLVED.

USING A FUNNEL, POUR THE YEAST INTO THE HYDROGEN PEROXIDE MIXTURE AND STEP BACK AND WATCH THE REACTION!

PLEASE NOTE THAT THIS REACTION MAY BE VERY HOT AND CAN IRRITANT THE SKIN. IT'S TYPICALLY FINE TO TOUCH AFTER IT HAS HAD TIME TO COOL DOWN, HOWEVER, TO BE EXTRA CAUTIOUS YOU SHOULD STEER CLEAR OF LETTING YOUR LITTLE ONES PLAY WITH IT.
